

RESOLUTION 4-12-82

A RESOLUTION RELATIVE TO THE INTRODUCTION OF  
FLUORIDES INTO THE PUBLIC WATER SUPPLY

(For Cities and Towns in which the Common Council or  
Town Board operates the Municipal Water Supply.)

WHEREAS investigations by competent dental, medical and public health  
authorities show that the presence of fluoride in drinking  
water is a deterrent to tooth decay; and

WHEREAS laboratory analysis shows that such chemical substance in  
optimum quantities is not found naturally in the public  
water supply of Town of St. John; and

WHEREAS Regulation HSE 2 of the Indiana State Board of Health permits  
the addition of certain fluoride compounds to public water  
supplies within controlled limits:

THEREFORE BE IT RESOLVED that the (Water Works Superintendent) is  
hereby authorized and directed to have plans and  
specifications prepared for the purchase and installation of  
equipment to add (sodium fluoride) to the water being dis-  
tributed by the (city water works), and to submit them to the  
Indiana State Board of Health for approval; and

BE IT FURTHER RESOLVED that, upon the approval of these plans and  
specifications by the Indiana State Board of Health, such equip-  
ment and supplies be purchased and installed in the manner pro-  
vided by state law, and that thereupon said fluoride compound be  
added to the public water supply in sufficient quantities to bring  
the total amount of fluoride ions (F-) present in the finished  
water to the optimum concentration recommended by the State Board  
of Health but never exceeding 1.5 parts per million by weight.
